

Ernte 1969

- 2 -

19. Januar 1970

The samples sent to you represent approx. the half of our Tr. spelta-collection. The rest will be sent to you after the harvest 1970.

Dr. J. C. Craddock

Grain Collection Building

Moreover we shall prepare for you from

1. Spring wheats of the collection Dr. Mayr Beltsville, Maryland *May 70*
2. Winter wheats from Switzerland USA *April 70*

As soon as the next harvests will be available you will receive:

P/fo

3. Spring wheats from Switzerland *April 70*
4. Winter wheats of the collection Dr. Mayr
5. Spring Triticum spelta Switzerland *April 71*
6. Tr. monococcum from Switzerland *monococcum*

All Dear Dr. Craddock, are composed mainly of lines or mixtures of unselected land varieties. Only a few breeder varieties are incorporated.

these days we have sent you 3 boxes with 928 samples of Triticum spelta for your Triticum collection. As we understand, samples incorporated in your collection are free for distribution to everybody.

SWISS FEDERAL RESEARCH STATION
